

# Wedgewood

## SINGLE FLOOR: 1981 SQ. FT.

*From our Ranch Series of pre-designed homes*

Single-floor living is becoming more important as we age and desire comfortable and safe living spaces for the years to come. Since there is no second floor, the entire home is cathedral ceiling with massive beams and rafters overhead supported by posts that help define the space.

# Woodhouse®

THE TIMBER FRAME COMPANY™

Add a lower level for additional living area and we can design a post and beam floor plan for that space as well. Start dreaming and we'll start designing. Call today.
